REMARKS

Claims 1-58 remain in this application. Please amend paragraph [0039] to correct a typographical error. The typographical error was that the hydroxyl number for Pluracol® 593 was stated as 460. However, the hydroxyl number is 46. Applicant attaches, at tab 1, a technical bulletin for Pluracol® 593 which states the hydroxyl number as between 44 and 47. The technical bulletin was published August 2001.

The entrance of this preliminary amendment for the purposes of filing the attached continuation application is respectfully submitted.

Respectfully submitted

Pluracol® 593

Specialty Polyol

Technical Bulletin

August 2001

Pluracol® polyol 593 is a 3650 molecular weight polyol containing a high proportion of ethylene oxide in the polyol chain. Pluracol 593 can be used in the formulation for hydrophilic flexible slabstock foams. Pluracol 593 is incompatible with other slab polyols and will separate from other polyols unless continuously agitated.
